How are lithium-ion battery prices calculated?

Lithium-ion battery costs are based on battery pack cost. Lithium prices are based on Lithium Carbonate Global Average by S&P Global. 2022 material prices are average prices between January and March. Technology cost trends and key material prices for lithium-ion batteries, 2017-2022 - Chart and data by the International Energy Agency.

Why are lithium-ion batteries so expensive?

The cost of raw materials, particularly lithium carbonate, plays a significant role in the pricing of lithium-ion batteries. The recent decrease in lithium prices has been a major factor in lowering battery costs. As lithium is a key component in these batteries, fluctuations in its price directly impact the overall cost of battery production.

How long does a lithium battery last?

This is your battery's durability. The most modern lithium battery models can reach up to exceed 5,000 charges/discharge cycles with a 10 years life duration. Note to our readers: These prices were pulled from the respective manufacturers' websites on 2024/02/01 and consider on-going sales prices.

How will Lithium prices affect EV battery prices in 2023?

Effect on Battery Prices: The decrease in lithium prices is expected to further lower the prices of lithium-ion batteries, continuing the trend observed in 2023. In June 2024, the average prices for EV battery cells saw a decrease: Square Ternary Cells: Priced at CNY 0.49 per Wh, down 2.2% from May.

How do you calculate battery costs?

It is a philosophical choice how to present battery costs. You can add all of the cost lines together (in \$) and divide them by the total power rating in kW (yielding a \$/kW metric).

How do you calculate grid-scale battery costs?

Grid-scale battery costs can be measured in \$/kW or \$/kWh terms. Thinking in kW terms is more helpful for modelling grid resiliency. A good rule of thumb is that grid-scale lithium ion batteries will have 4-hours of storage duration, as this minimizes per kW costs and maximizes the revenue potential from power price arbitrage.
