

How to deal with sweat stains on photovoltaic panels

Should you clean solar panels without feet firmly planted?

Never clean solar panels without your feet firmly planted on a stable surface. While cleaning, it's crucial to avoid damaging any electrical components, as this could make the solar panels less effective or disrupt their operation altogether. Always weigh the safety risks and benefits before cleaning your solar panels.

Should you de-Grim your solar panels?

De-griming your solar panels can improve their overall efficiency. A study by the National Renewable Energy Laboratory (NREL) outlines that the U.S. loses up to 7% of its power through "soiled" or dirty solar panels each year. Maintaining your solar panels allows them to harness more sunlight, generate more solar energy, and save you more money.

How do I know if my solar panels need a cleaning?

A drop in energy output can be an indication that your solar panels could use a cleaning. The mySunPower® app gives you complete control over your SunPower solar power system, allowing you to track and monitor your energy production in real-time. With SunPower, you'll always know exactly how well your panels are performing.

How do you clean a solar panel?

Just be sure to rinse the panels with water afterward. Specialty solutions: A solar panel-specific cleaning solution can help you tackle almost any dirt or debris. Pressure wash: Low-pressure washers can tackle deep-rooted grime when other methods don't cut it. Avoid high pressure washers, which can cause damage to your solar panels.

Should I Turn Off my solar panels before cleaning them?

Yes, you should turn off your solar panels, and any adjoining electrical equipment, before attempting to clean them. While solar panels are built to withstand the harsh Aussie climate, if you're hosing your panels down some water may get on the underside of the panel, which could potentially cause issues and damage if you're not careful.

Can you use a pressure washer to clean solar panels?

It's best to avoid using a pressure washer, scourers or harsh cleaning chemicals when it comes to cleaning solar panels, as they may damage the system or surface of your panels. And if you're not sure about getting up on the roof, you can always get a professional solar panel cleaner to come clean your panels for you.

Removing built-up hard water stains requires some gentle scrubbing with an acidic cleaner to dissolve the minerals. With the right materials and proper technique, you can safely rid your solar panels of hard water stains ...

How to deal with sweat stains on photovoltaic panels
