

How to install photovoltaic panels without an electricity meter

Can I install solar panels myself?

You can install solar panels yourself, but doing it alone involves risks. Going solar has significant financial benefits: it reduces your monthly electricity costs and can even increase the value of your home. Incentives can lower your overall cost drastically, but solar is still a big investment.

Do solar panels need an inverter?

The necessary wiring will run through them to connect the panels to the electrical system. Since solar panels generate DC power, you'll need to use an inverter to convert the energy to AC power for your home. Some systems use a central inverter, but these have a major drawback: if one panel malfunctions, the rest of the array can also go down.
