

# How to install the panels in a photovoltaic sun room

Should you install solar panels on your roof?

Installing solar panels on your roof can both save you energy costs and reduce your home's environmental impact. Even though there are some DIY solar panel options, installing them is a highly complex project, and you'll still need assistance from an experienced professional.

How do I prepare for a solar panel installation?

Installing solar panels helps homeowners save money and invest in cleaner energy. To prepare for an installation, determine your energy needs and home compatibility with a solar panel system. The installation requires complicated electrical work and paperwork that any reliable solar installer can handle.

How to choose a solar panel installation site?

Prioritize ease of maintenance when selecting your solar panel installation site. The panels should be accessible for regular cleaning, as dust, bird droppings, snow can accumulate and reduce their effectiveness. -- Remi Akinwonmi, solar expert and clean energy advocate, Advisory Board Member Wondering how to install solar panels?

Can I install my own solar panels?

Although DIY options are available, hiring a professional solar company is best to ensure your panels are correctly and safely installed. Yes, it's possible to install your own solar panels. However, DIY installations require electrical skills and advanced knowledge of solar energy that most DIYers don't have.

Can solar panels be installed on a south-facing roof?

For homes in the Northern Hemisphere, a shade-free, south-facing roof with solar panels placed at a 30-degree tilt is ideal for production. This is not to say that having a roof that is partially shaded, or east- or west-facing, puts a solar PV system out of the question.

How long does it take to install solar panels?

Select solar panels and inverters. Your installer will order the equipment and schedule the installation. Professional technicians install the solar panels, typically taking one to three days. Local authorities inspect the system, and once approved, your solar panels are connected to the grid.
