

How to install the photovoltaic panels of State Power Investment Corporation

Should you install solar photovoltaic systems?

Many homeowners are installing solar photovoltaic systems to reduce their energy costs as well as greenhouse gas emissions. There are many things to consider when installing solar such as life of your existing roof, financing, and energy efficiency.

How do I prepare for a solar panel installation?

Installing solar panels helps homeowners save money and invest in cleaner energy. To prepare for an installation, determine your energy needs and home compatibility with a solar panel system. The installation requires complicated electrical work and paperwork that any reliable solar installer can handle.

Does Pennsylvania have a list of qualified solar energy installers?

The Commonwealth of Pennsylvania does not maintain a list of qualified solar energy installation companies. Solar installers operating in Pennsylvania are considered home improvement contractors and must maintain a certificate of registration issued by the Bureau of Consumer Protection.

How long does it take to install solar panels?

Once you decide on a solar company and system, the installation process begins. The time it takes to get your solar panels up and running depends on a handful of factors. Generally, you can expect to wait a few months before your solar panels produce energy for your home. In that time, your solar company should follow these five main steps: 1.

How do you install solar panels in your yard?

The type of soil in your yard can dictate the best foundation option. A set of vertical aluminum pipes are installed onto the foundation, followed by the rails. The solar panels are then placed directly onto the structure. Ground mount solar mounting. Source: Wanhos Solar Once the solar panels are installed, the system needs to be activated.

How do I choose a solar installer?

Choose a solar installer. An installer can help you determine whether your roof is suitable for solar panels. Begin by researching qualified, insured installers online or asking for recommendations from people who've gone solar. Comparison-shop by asking multiple installers to come assess your roof.
