

Do you need a solar panel removal service?

Considering a solar panel system is a large investment, it makes sense to only let experienced solar installers handle your solar panels and perform this solar panel removal service. Moreover, removing and reinstalling solar panels involves a complicated permitting process that's best navigated by a qualified solar installer.

Should I replace my solar panels?

You should also be ready to spend more if you're changing the design of your roof, or using customized roofing materials to enhance the energy efficiency of your roof. If your solar panels are damaged or no longer generating as much electricity as they should, your solar company may recommend replacing them.

Can I remove solar panels myself?

While it is technically possible to remove solar panels yourself, it is highly recommended to consult with a professional solar installer or technician to ensure the process is done safely & correctly. Solar panels are delicate and expensive components, and improper handling can lead to damage or injury.

Should you repair or replace a cracked solar panel?

If your solar panel is cracked, it is easier and safer to replace the panel rather than try to repair it. It is important to remove the glass as soon as possible to stop any possible damage to the solar cells. In this blog we discuss: Why you should replace defective solar panels rather than repair them.

How do I request a solar panel removal & reinstallation?

Before we can proceed with your R&R, you'll need to confirm that your roof type is eligible for solar panel installation. Submit your R&R request to start the removal and/or reinstallation process from the Tesla app('App' & 'Energy Site' & 'Support' & 'Get Help' & 'Other' & 'Removal & Reinstallation').
