

What is a DIY solar system guide?

A DIY solar system guide that teaches you everything from basic electrical rules to sizing your solar panels.

How do I choose the best way to use solar electricity?

Before deciding on the best way to use solar electricity at home, assess the potential solar energy that can be produced at your address. Because PV technologies use both direct and scattered sunlight to create electricity, the solar resource across the United States is ample for home solar electric systems.

How to build a DIY solar system?

Plan the Wiring: Plan the wiring of your solar system, including the placement of your solar panels, the connection of your solar panels to the inverter, and the connection of the inverter to your battery system. Now that you have planned and designed your DIY solar system, it's time to install it.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar. See the Spanish version [here](#).

Should I buy or install a solar system?

Purchasing and installing a system that you fully own and maintain is no longer the only option if you want to go solar. Even if you rent your home or don't want to purchase a rooftop system, there are many programs will enable you to still benefit from solar electricity.

Should you install solar panels before installing a new solar system?

The time to contemplate any big near-term additions to your electrical needs is before you install solar because expanding an existing system later can be costly and problematic, says Los Gatos, CA, solar installer and energy podcaster Barry Cinnamon. You'll likely need to replace the inverter, and the new panels won't match the existing ones.

There are a number of steps to follow when planning to power your home with solar energy. After choosing which option is best for you to use solar (see step 3), follow the steps afterward that apply to you. ... Contractors will also help ...
