

Campbell, California-based utility-scale solar and storage developer RAI Energy has commenced permitting for a hybrid solar and storage facility located in Morgan County, Colorado, US. The developer has filed two Special Use Permit (SUP) applications with Morgan County - one relating to the solar portion of the project and the other for the BESS.

Taiwan is in the process of deploying energy storage systems to augment the flexibility of power dispatch and avert recurring power outages. Taipower's AFC services contributes significantly to the stabilization of the Taiwanese power grid. In Taiwan, Taipower has said that it is targeting 1,000 MW storage capacity by 2025.

The 6 MW/6 MWh BESS will be installed in the municipality of Taoyuan, northwestern Taiwan and will utilise Fluence's Gridstack technology. The facility will provide automatic Frequency Control (AFC) services for the country's major utility Taiwan Power Company (Taipower).

Swedish public utility Vattenfall has opened its Energypark Haringvliet in the Netherlands, which combines wind, solar and a 12MWh battery energy storage system (BESS). The project, located 20km south of Rotterdam, features six wind turbines, 115,000 solar panels and a BESS with 12MWh of energy capacity.

Hawthorne Renewable seeks permit for 1.2GWh hybrid BESS in Washington against backdrop of local moratoriums. December 5, 2024. Hawthorne Renewable Energy has commenced permitting for a 300MW solar project co-located with a 300MW/1,200MWh BESS in Grant County, Washington.

The project will be co-located with a 100MW/200MWh BESS, and the Egyptian Electricity Transmission Company will acquire power from the upcoming Scatec project for 25 years. With both projects announced simultaneously, both AMEA Power and Scatec have made claims to developing the first utility-scale BESS project in the country.

The company said its projects in Taiwan provide both ancillary services like E-dReg (Enhanced Dynamic Regulation) as well as behind-the-meter peak shaving services. It follows its commissioning of a 311MWh system in December, the largest in Taiwan, which was specifically designed for E-dReg as the firm said at the time.

The 6 MW/6 MWh BESS will be installed in the municipality of Taoyuan, northwestern Taiwan and will utilise Fluence's Gridstack technology. The facility will provide automatic Frequency Control (AFC) services

for the ...

Fluence has signed a deal for its third battery energy storage system (BESS) project in Taiwan, its biggest in the region so far. The global energy system integration and energy optimisation services company announced today that it is targeting completion of the project for the middle of next year.

The company said its projects in Taiwan provide both ancillary services like E-dReg (Enhanced Dynamic Regulation) as well as behind-the-meter peak shaving services. It follows its commissioning of a 311MWh ...

A recent example was a 311MWh BESS in Taiwan from EV and BESS firm NHOA, which was specifically designed for a new ancillary service called E-dReg. The project is Fluence's second in the country, and was first announced in April 2022.

Energy Superhub Oxford, a project with a lithium-ion-vanadium hybrid battery energy storage system (BESS) totalling 55MW, has officially launched. The opening of its EV charging park today (July 5) marks the final step in delivering the project, which was covered in-depth in Vol.30 of PV Tech Power, Solar Media's quarterly technical journal ...

System integrator Fluence has supplied a 60MW/80MWh battery energy storage system (BESS) in Taiwan, which has started commercial operations. State-owned utility Taiwan Power Company (Taipower) deployed the project, and is located at the Taoyuan Longtan ultra-high voltage substation.

The utilities plan to split ownership of the two projects, with Wisconsin Electric taking the lion's share of the BESS capacity from both facilities: 100% from Dawn Harvest (50MW) and 80% from Saratoga (40MW). ...

HYBRID BESS. MEG 50kW x 75kWh. MEG 100kW x 150kWh. MEG 150kW x 225kWh. MEG 200kW x 300kWh. MEG 300kW x 664kWh. MEG 500kW x 1075kWh. Our Renewable Energy Story - Awarded the 1st Global Solar Kit Certification from TUV - TUV Solar Kit Certificate Info.
