

Lithuania's Ignitis will invest up to EUR270 million (\$273.8 million) to acquire an unspecified Latvian renewables company that owns the rights to develop a 200 MW hybrid wind-solar project at an undisclosed location in Latvia. The acquisition price will be paid upon achievement of specific development milestones, Ignitis said in a statement.

SIA ACCEDO will develop hybrid projects, combining solar, wind and battery energy technologies, in the territory of Latvia with a total capacity of up to 600 MW. This summer SIA ACCEDO concluded a long-term development services cooperation agreement with one of the world's largest wind power plant manufacturers for the development of hybrid ...

Estonian renewable energy company Sunly is building three solar parks in Latvia with a cumulative capacity of 225 MW. The projects are being developed as hybrid parks, combining solar with...

All three schemes were developed as hybrid parks, combining solar and wind energy along with a battery energy storage system (BESS), a press statement says. The portfolio comprises a 54-MW site near Matisi village in Valmiera, a 90-MW facility in Dagda Parish in Kraslava Municipality, and a solar farm of 81 MW situated near the village of ...

Today, Latvia is a much different player in the renewable energy field. Over the past few years, the nation has shifted its focus toward integrating wind and solar energy on a broader scale, developing hybrid energy parks that combine wind turbines, solar panels, and battery storage systems.

All three solar energy parks in Latvia will be developed as hybrid parks, combining solar and wind energy along with a battery energy storage system (BESS). This approach will enhance the predictability of energy production and reduce grid connection and operational costs.

All three solar energy parks in Latvia will be developed as hybrid parks, combining solar and wind energy along with a battery energy storage system (BESS). This approach will enhance the ...

The renewable energy producer "Sunly" has attracted financing in the amount of 300 million euros to facilitate the construction of 1,3 GW of solar, wind and hybrid parks with energy storage functions in Latvia, the entire Baltic region as a whole and also in Poland.

Estonia-based renewable energy developer Sunly has officially begun connection installations and preparatory steps for the construction of three major solar projects in Latvia, designed with a total capacity of 225 megawatts (MW).

Lithuania's Ignitis will invest up to EUR270 million (\$273.8 million) to acquire an unspecified Latvian renewables company that owns the rights to develop a 200 MW hybrid wind-solar project at an ...
