

Our work with the Bank of Cook Islands has been featured as a case study from our partner Vertiv. BCI initially reached out to us, a Vertiv partner, to order an 8kVa uninterruptible power supply (UPS) solution.

It will construct new solar photovoltaic power plants on up to six islands of Cook Islands" southern group. The project will result in annual savings of 1.09 million liters of diesel consumption and ...

TAU is a critical key infrastructure asset for Rarotonga and the wider Cook Islands. The primary function of Te Aponga Uira (TAU) is the provision of electricity to the people of Rarotonga in a reliable, safe and economical manner. Our Vision "Empowering the community through sustainable and innovative energy solutions."

To support this ambitious plan the Asian Development Bank and the European Union fund the Cook Islands Renewable Energy Sector Project, which will construct up to six solar photovoltaic (PV) power plants with a total installed capacity of about 3 megawatts-peak coupled with battery to store electricity from solar energy.

It will construct new solar photovoltaic power plants on up to six islands of Cook Islands" southern group. The project will result in annual savings of 1.09 million liters of diesel consumption and annual reduction of 2,930 tons of carbon dioxide emission, for greater energy security and sustainability in the Cook Islands.

The new system, which will be solar powered with AC backup, will also have the advantage of reducing power consumption from the main grid and providing redundancy of operation with secondary power supply. ICI will also be working with the Aitutaki Island Government and the supplier on installing the new system.
