

Who is IBS intelligent battery system?

IBS Intelligent Battery System GmbH develops, manufactures and distributes electronic systems and modules for the 12V and 24V battery market. 15 years of experience in battery technology and microelectronics have led to a wide range of versatile products.

How does the IBS Global Monitor a car battery?

The IBS Global measures the condition of the battery and provides information on the state of charge (SOC), ageing (SOH) and starting capability (SOF). The sensor can be easily integrated into the vehicle electrical system where it monitors battery voltage, power and temperature 12 V vehicle electrical system environments.

What is the IBS global?

The IBS Global is designed for use in starter, gel and AGM batteries to monitor starter or consumer batteries in the vehicle. Using the standardised LIN protocol, the sensor can be directly integrated into the vehicle electrical system, e.g. CAN BUS.

What is an intelligent battery sensor?

Intelligent battery sensors (IBS) for 12-volt lead-acid batteries ensure optimum energy management in cars and vans (both with internal combustion engines and electric motors), agricultural machinery, last-mile vehicles, motorhomes, small construction machines, quad bikes, diesel forklifts and marine applications.

Sierra Expeditions is pleased to announce that we are now carrying IBS - Intelligent Battery Systems. This computerized dual-battery manager kit was developed in Switzerland. This state-of-the-art system uses a RISC micro-computer to either isolate or link multiple batteries as needed.

IBS Intelligent Battery System GmbH develops, manufactures and distributes electronic systems and modules for the 12V and 24V battery market. 15 years of experience in battery technology and microelectronics have led to a wide range of versatile products.

IBS Intelligent Battery System GmbH entwickelt, fertigt, und vertreibt Elektroniksysteme und Module rund um den 12V und 24V Batteriebereich. 15 Jahre Erfahrung im Bereich Batterieelektronik haben zu einer grossen Zahl von universell einsetzbaren Produkten geführt.

TLD's intelligent Battery Systems (iBS) is a modular battery design. It consists of individual 80 VDC packs

that can be combined like building blocks, to create batteries with a 22 kWh increment (e.g. 44, 66, 88 kWh or higher). The iBS can be used on all TLD GSE electric product lines.

RAMPTECH® IBS is designed with advanced life cycle management that allows a significant decrease on the total cost of ownership. Due to its flexible design the battery life can be extended by changing its application. RAMPTECH® IBS MODULAR ADVANTAGE CAN BE USED LIKE BUILDING BLOCKS IN 22 KWH INCREMENTS
