

What is a solar roof storage system?

The name is instantly recognizable, and its sleek aesthetic means this storage system fits into any design, indoors or out. The AC-coupled battery backup is included when you purchase solar tiles (which sit on the roof) or solar roof tiles (solar tiles that replace your existing roof).

Does the SolarEdge home battery need a separate inverter?

We'll talk more about this below. The SolarEdge Home Battery is part of a DC-coupled ecosystem, meaning you won't need to buy a separate inverter for the battery and your energy is only converted once from storage to your house, instead of three times with an AC-coupled system. This makes your system more efficient.

Does a solar roof have a battery backup?

The AC-coupled battery backup is included when you purchase solar tiles (which sit on the roof) or solar roof tiles (solar tiles that replace your existing roof). The solar roof is made of glass solar tiles, which produce energy, and steel roofing tiles, which provide longevity and corrosion resistance to your roof.

Why do people install home battery storage systems?

"Energy independence is one of the biggest reasons people install home battery storage systems," says Gerbrand Ceder, professor at UC Berkeley and faculty staff scientist at Lawrence Berkeley National Laboratory. "It's seamless, so you don't even notice when power switches from the grid to your battery backup system."
