

Will the EV market make Iceland self-sufficient?

In the long run, Skulason thinks the development of the EV market will make the island self-sufficient in terms of energy. Iceland might have undergone an EV revolution, but as the rest of Europe and the world lags behind, tourists visiting the country have failed to embrace the island's new way of travelling.

Is Iceland a leader in the EV market?

Iceland has become a European leader in the EV market, second only to Norway. - Copyright Canva In only five years, Iceland has become one of the world's leaders in the EV sector. Can the rest of Europe follow suit? Iceland is kilometres ahead of most other European countries when it comes to EVs. Literally.

Is Iceland a good place to buy EVs?

Iceland is kilometres ahead of most other European countries when it comes to EVs. Literally. The country now has the second-highest market share in the world after Norway, despite the fact that only a few years ago Iceland completely lacked the charging infrastructure necessary to cover the island's territory and run a significant number of EVs.

How many electric cars are sold in Iceland?

In the first half of the year, some 85 per cent of private cars sold in Iceland were plug-ins. The number of electric cars sold on the market on the island has jumped up by 25 per cent this year from 60 per cent of all newly registered vehicles in 2021, and 46 per cent in 2020.

Can EVs be used in Iceland?

ON Power decided to set up EV chargers all along the coast of the island, with fast chargers placed 100 kilometres apart. The infrastructure covered every corner of Iceland, even those places people never drove to. This way, drivers would have no excuse not to use EVs," lafsd&#243;ttir said.

Why are EVs becoming more popular in Iceland?

"I think the main reason for the adoption [of EVs] is the incentives that the government gave," Jon Bjorn Skulason, General Manager of Icelandic New Energy, told Euronews Next. Iceland's government has made EVs cheaper to own, lowering taxes on CO2-free vehicles, and eventually removing VAT from EVs entirely.

Propel Advanced. Maximize your watts during sprints, breakaways and solo attacks. This aero road machine is built to give you a real advantage against the wind. Because small gains lead to big wins.

SmartPropel is een hoogtechnologische onderneming, gespecialiseerd in R& D en Productie van Lithiumbatterij voor 15 jaar.
