

What makes IDM a leader in Intelligent Energy Management?

Our long-established family business is one of the technology leaders for intelligent energy management in our company, primarily due to its development expertise and numerous technical innovations. One of the milestones in iDM developments was the introduction of fresh water technology for hygienic water heating in 1987.

Is IDM energy a good company?

A steady growth indicates that the management of the employees is the right one. After more than 45 years, the iDM energy family is proud of the company and their employees, who were and are the pillars of success. If playback doesn't begin shortly, try restarting your device.

Are IDM heat pumps sustainable?

iDM HEAT PUMPS provide sustainable heat that makes you independent! Heat pump systems from 2 - 1500 kW You are looking for - We have the solution! From a small family house to a hotel complex, we offer the perfect solution for your building. Single-family house Multi-family house Large object Which heat pump

Where is IDM based?

From the company's headquarters in Mauterhorn in East Tyrol, customers all over Europe are supplied with high quality and reliability. Installers receive comprehensive planning support for the realization of new projects, and can also regularly acquire up-to-date know-how at events and seminars of the iDM Academy.

When did IDM start?

One of the milestones in iDM developments was the introduction of fresh water technology for hygienic water heating in 1987. Since the end of the 1990s, the focus has been on the development and production of economical and environmentally friendly heat pump systems, hot water preparation and also for cooling buildings.

What is Greenland's domestic energy demand?

All scenarios include Greenland's domestic energy demand. The list of scenarios is as follows: "Steady Europe": In 2030, 1.65% of European demand for liquid hydrocarbons is included, in addition to 5% of European demand for e-ammonia and e-methanol. In 2050, 10% of the demand for e-FTL, e-ammonia, and e-methanol is supplied.

IDM-Energiesysteme (energy systems) has announced a business expansion, including plans to hire an additional 210 employees by the end of 2024 in Mauterhorn. The background of the business expansion is an expected increase in turnover of 30 per cent for 2024.

iDM-ENERGIE SYSTEME es una empresa austriaca, pionera europea en el uso de fuentes de

energy&#237;a natural.. Fundada en 1977, ocupa una posici&#243;n de liderazgo en el mercado europeo por su compromiso con el desarrollo y la innovaci&#243;n, ya que aporta al mercado soluciones &#250;nicas, tecnol&#243;gicamente avanzadas y de alta calidad.

Greenland's transition from a fossil fuels-based system to a 100% renewable energy system between 2019 and 2050 and its position as a potential e-fuels and e-chemicals production hub for Europe, Japan, and South Korea, has been investigated in this study using the EnergyPLAN model.

Manufacturer of heat pump systems designed to come up with regenerative energy sources. The company's energy systems take the energy from earth, air, water and sun and utilizes this extracted energy for heating, cooling and for hot water production with lower level of energy consumption, enabling users to get access to energy sources that are ...

IDM-Energiesysteme specializes in the development, production, and distribution of efficient, regenerative heat energy systems for harnessing environmental energy from earth, water, air, and sun in the renewable energy sector. Use the CB Insights Platform to explore IDM-Energiesysteme's full profile.

In combination with a photovoltaic system, the heat pump is even completely emission-free and CO2-neutral. Reduce your heating costs and opt for a modern, space-saving heat pump from iDM. No matter what form of

energy is available where you live - ...

The energy from the earth or groundwater is rendered usable for the heating system and to heat up service water with electricity. Efficiently provide heating and air conditioning in an environmentally friendly manner using one of 150 different iDM heat pump systems for new buildings or renovation projects.

2.2.2.1. 0-10V signal from energy management systems Energy management systems (EMS) can communicate with the heat pump via a 0-10 V signal. The heat pump is operated with the supply current. Power supplier Excess Return into the grid Sale of electricity Power purchase from energy supplier Electricity purchase Inverter Bidirectional meter

A heat pump is a climate-friendly option for heating - and even cooling. It uses the available environmental energy from the earth, air or water and converts it into heat or coolness. In combination with a photovoltaic system, the heat pump is even completely emission-free and CO<sub>2</sub>-neutral.. Reduce your heating costs and opt for a modern, space-saving heat pump from ...

Volksgasse 8, in Vienna's historic Hietzing district, is home to an impressive three-storey residential building dating back to 1910. The building was extensively renovated and extended as part of the refurbishment and modernization in 2022/2023.

In combination with a photovoltaic system, the heat pump is even completely emission-free and CO<sub>2</sub>-neutral. Reduce your heating costs and opt for a modern, space-saving heat pump from iDM. No matter what form of energy is available ...
