What does it mean to lease your land for solar?

Leasing your land for solar means allowing a solar company or developer, like OYA Renewables, to design, permit, construct, and operate a solar energy system on your property in exchange for payment or compensation, typically for a set period (e.g. 25 years).

Are solar farms a good investment in India?

Solar farms offer returns in different ways, such as saving on power bills, earning from net metering, and big government incentives. The key part of any renewable energy project in India is how much power and savings it brings. Solar farms can power many homes and businesses. This helps reduce reliance on the power grid and cuts electricity bills.

How much does a 1 acre solar farm cost in India?

Setting up a 1-acre solar farm in India requires a hefty investment. You might spend around 4 to 5 crore Indian Rupees. This includes the cost for hardware, land, and installation. Getting a quote from a reliable solar company can give you a more exact price, depending on your project's details.
