

Where are Ineos energy assets located?

Key operated assets are in the Eagle Ford shale basin in South Texas. Owning and operating producing US onshore assets is part of INEOS Energy's strategy to build a global integrated portfolio, fit for the energy transition, offering high-quality energy solutions to its customers.

What does Ineos do?

We are a key supplier of energy and carbon storage solutions to our internal INEOS customers as well as third parties. We produce and trade oil, gas, Liquefied Natural Gas (LNG) and carbon credits. This is supported by our investments in low carbon and carbon storage technologies, which will help sustain our business through the Energy transition.

What are some examples of Ineos energy?

Good examples of this are Project Greensand, our pioneering Carbon Storage project in the Danish North Sea and our investment in HydrogenOne Capital. "At INEOS Energy we are looking to provide the tools for people to be able to decarbonise their energy consumption."

Will Ineos invest in shale gas in the UK?

In November 2014, Ineos announced plans to invest up to £640m in shale gas exploration in the UK. The company planned to use the gas as a raw material for its chemicals plants, including Grangemouth near Falkirk. Ineos CEO, Jim Ratcliffe, has criticized restrictions on fracking in the UK.

Does Ineos own wind power?

The business is focused on aromatics and acetyls. It has interests in 14 plants in Asia, Europe and the U.S., and produced 9.7 million metric tons in 2019. The deal was expected to close prior to the end of 2020. In September 2020, Ineos signed a 10-year deal to acquire offshore wind power from Engie's Northern wind farm.

What happened to Ineos?

In 2007 Ineos formed a joint venture with Lanxess and created Ineos ABS, comprising Lanxess's activities in acrylonitrile butadiene styrene production, located in Tarragona. Ineos paid EUR35 million in a first tranche. In March 2010 Ineos Healthcare terminated its drug development programme for commercial reasons.
