

Can Macao increase solar energy?

The Macao government also sees an opportunity to increase solar energy. To encourage the installation of PV systems, officials passed a set of safety and installation regulations in 2015.

Is natural gas a problem in Macao?

As a member of the Smart Energy Group of UM's State Key Laboratory, which focuses on optimising clean energy use and production, Zhang believes expanding the use of natural gas poses major problems, especially in the city's older districts. "Many buildings and [much of the] infrastructure in Macao are outdated.

Does Macao have a photovoltaic energy contract?

The regulations require investors to enter into a 20-year contract for the purchase of photovoltaic energy with Macao's sole energy service provider, Companhia de Electricidade de Macau (CEM). Essentially CEM will purchase the electricity produced to ensure investors profit within a reasonable period.

Does Macao have a climate problem?

As a commercial hub, Macao faces the same challenge. Energy consumption from electricity, transport and buildings accounts for nearly 90 per cent of Macao's carbon emissions directly caused by fossil fuels. With climate change posing grave threats to the future of society, city leaders say they have made reducing emissions a priority.

Does energy price affect energy-saving technology innovation?

Energy price is an important mechanism that affects supply and demand in the energy market, therefore, energy price also affects energy-saving technology innovation (Popp, 2002; Yang et al., 2019).

In June 2019, Innovate Energy, a consortium consisting of ENGIE Services Canada, PCL Constructors Canada, PCL Investments Canada and Black & McDonald, closed a 35-year public-private partnership contract to modernize, maintain and operate the district energy system that heats 80 buildings and cools 67 buildings, including the Parliament Buildings, in Canada's ...
