

Is it possible to install solar panels for apartments?

Yes, it is possible to install solar panels for apartments. While apartment dwellers don't have access to an individual roof to install solar panels, several options are still available to utilize solar power and reduce energy bills.

How do I lease or rent solar panels?

Here's a step-by-step guide on how to lease or rent solar panels: Start by researching solar leasing companies in your area. Look for reputable companies with strong customer reviews and a proven track record. Consider their financing options, contract terms and maintenance policies. Contact multiple solar leasing companies to request quotes.

Are solar panels a good option for renters?

The simple answer for renters who want solar panels for their apartment or house is that it's possible!

How can I get solar panels for my apartment?

To get traditional solar panels for your apartment, the easiest way is to talk with your landlord. Here are some benefits to highlight if you decide to approach them:

Can a landlord install a solar panel system?

While you may be able to pitch your landlord to install a rooftop solar panel system, community solar is more likely to be your best bet to enjoy the benefits of solar if you don't own your roof space through incentives like virtual net metering. Community solar participants can earn credits back on their electricity bill, saving money every month.

Can you install solar panels on your own?

Since you cannot install a solar panel system on your own, another option is to use miniature or alternative solar power systems. Portable solar panels are one such option. They're essentially tiny solar panels that you place in your window.
