

Do you want a leaking roof after installing solar panels?

A leaking roof is the last thing anyone would want after having their solar panels installed and as per the old adage, prevention is better than cure. Nobody wants their solar panels leaking after they've gone to the trouble of investing in solar energy. Read these preventative steps to be taken.

Can you install solar panels on a roof without drilling?

Install Solar Panels On A Roof Without Drilling (Do This!) One of the main drawbacks of the traditional way most solar panels are installed on residential properties is that it requires drilling through the roof, which presents a few problems. The biggest problem with drilling into the roof is that you are increasing the chance of the roof leaking.

Should you install solar panels on your roof?

Installing solar panels on your roof can both save you energy costs and reduce your home's environmental impact. Even though there are some DIY solar panel options, installing them is a highly complex project, and you'll still need assistance from an experienced professional.

What should I do if my solar panel is leaking?

Regularly clean the panels and surrounding roof areas to prevent buildup of dust, leaves, and other debris that can cause damage. Inspect and reinforce roof flashings and seals to prevent leaks and water damage, especially in areas surrounding the solar panel mounts.

Should solar panels be installed on a north-facing roof?

In the southern hemisphere, it's ideal to install solar panels on north-facing roofs because that's where they get the most sunlight. If you live in the northern hemisphere, you should install your solar panels facing south. But what if your roof faces the wrong direction? If your roof faces east or west, solar panels are still a viable option.

How do I avoid solar on my roof?

Another option to avoid solar on your roof entirely is to install a ground mount or join a community solar plan and receive solar energy from an offsite location. A rooftop solar panel installation is a great investment that won't lead to roof damage when you work with a professional, experienced installer.
