How do I install a solar hot water system?

(Learn more about the types of systems available [here](#).) In most solar hot water installations, the first step is to put the solar collectors in place on your roof. Most solar hot water collectors are similar in shape to photovoltaic solar panels and will lie flat on your roof.

What size hot water tank does a solar water heater use?

The size of the hot water tank in a solar water heater system will usually depend on the size of the solar water heating units on the roof. The more units you install, the more hot water you can store and the larger you want the storage tank to be.

Should you install a solar hot water system?

Most people who install such systems do so for the energy efficiency they gain, and it can take you a long way towards off-the-grid living. A solar hot water system is also suitable for both heating your water for use in the home, as well as heating a pool, which can also give you a huge cost saving.

Where is a solar hot water tank located?

The storage tank, and the heat exchanger contained within it, are the largest part of a solar hot water system and are usually located in a basement or utility closet, where they are accessible by water lines and antifreeze tubing. If you are replacing a gas-powered water tank, this step is essentially a replacement project.

Do you need a backup tank for solar hot water?

Additionally, this is when you will want to make room for and install a backup tank to be powered by electricity or gas for the times when you run out of solar hot water. In order to connect your collectors to the heat exchanger and storage tanks, your installer will run flexible piping from your roof to your new storage tank or tanks.

Can a solar water heating system be used in any climate?

They can be used in any climate, and the fuel they use -- sunshine -- is free. Solar water heating systems include storage tanks and solar collectors. There are two types of solar water heating systems: active, which have circulating pumps and controls, and passive, which don't.
