

How do people invest in solar energy?

Individuals can invest in the solar energy industry by putting money into companies involved in some part of the solar power supply chain, including manufacturers of solar panels and operators of solar energy facilities. Individuals can also profit from solar energy by installing solar panels on their homes.

What is solar investing?

Solar investing generally refers to investing in companies that produce or sell solar energy products. This can include solar panel manufacturers, installers, or companies operating solar energy facilities. Investors usually invest in solar through traditional products like stocks, mutual funds, and exchange-traded funds (ETFs).

Will solar and wind power grow in 2023?

Regardless, the U.S. Energy Information Administration expects solar power generation to grow 75% and wind power to grow 11% between 2023 and 2025. Some renewable energy stocks have underperformed this year, so there's a runway for returns, and others have started to take off, with gains above 20% year to date.

Why are solar energy stocks down 27% in 2024?

For example, solar energy stocks, as tracked by the Invesco Solar ETF (TAN), have gradually dimmed from their 2021 highs. The ETF is down 27% in 2024 as of early August. Problems including interest rates and tariffs have put a dent in sales; most recently, consumer demand has been low.
