

# Investing in small-scale solar power projects

Is solar energy a sustainable investment?

As more individuals, companies and governments become concerned about global climate change caused by carbon emissions, there's an increased interest in renewable energy as part of a socially responsible investing portfolio. One of the most often-cited types of alternative energy is solar power. 6 Places to Find Sustainable Investments.

What is solar investing?

Solar investing encompasses investments in various aspects of the solar energy supply chain. Perhaps you invest in companies like First Solar (ticker: FSLR) that produce large-scale solar panels. It might even mean investing in a popular company like Tesla (TSLA) that hopes to create smaller solar products for homes.

How do large companies fund solar plants?

Large companies may fund solar plants "on balance sheet," providing equity themselves and obtaining debt as part of their broader operations and corporate financing. This model would be typical for self-generation (i.e., for a single user's own power needs), rather than the larger utility-scale projects that this guide focuses on.

How does a solar PV project make money?

Electricity from a solar PV project is converted to revenue by selling it to an off-taker. The amount of revenue will depend on the amount of energy generated and delivered and the price per unit of energy.

Should you invest in solar energy?

Another pro of solar investing is the fact that there's a relatively low environmental impact as compared with fossil fuels. While anything will have some impact, solar-powered electricity offers much lower greenhouse gas emissions than oil and coal, and it doesn't do the same damage to the land that you see with fracking.

How do solar power plants make money?

The key revenue stream for most solar power plants is the fee (tariff) paid for each kWh of electricity generated. As discussed in Section 12, sometimes there are other sources of revenue, such as renewable energy credits, tax credits, and other financial incentives available to developers.
