

How much energy did Iran spend in 2022?

According to the IMF, Iran spent \$163bn in explicit and implicit energy subsidies in 2022, which amounted to more than 27 per cent of GDP -- the highest share of the economy of any country in the listing.

Do Iranians have a right to cheap energy?

Subsidies are so large and have been in place for so long that many Iranians -- suffering from high inflation, falling living standards and a sliding national currency -- have come to feel they have a right to cheap energy.

Why does Iran have a shortage of electricity & gas?

Chronic under-investment in infrastructure exacerbated by US sanctions as well as mismanagement and huge state subsidies -- which encourage high fuel consumption and overburden the cash-strapped state -- have left Iran with worsening shortages of electricity, gas and petrol.

Will Iran face a natural gas shortage this winter?

This winter, Iran is expected to face a daily shortfall of 260mn cubic meters of natural gas. "The imbalance will keep growing unless we resolve our problems with the world," Behrouzifar said. Data visualisation by Alan Smith Copyright The Financial Times Limited 2024.

Why is Iran Facing a power blackout?

The start of rolling power blackouts in Iran this week amid critical fuel shortages has exposed the vulnerability of the oil-rich country to US sanctions and underscored the impact of years of under-investment. Iran has the world's third-largest oil reserves and second-largest natural gas reserves.

Will Iran reopen talks after Trump Victory?

With sanctions taking such a toll on the Iranian economy, Pezeshkian, who took office as president in July, has signalled an openness to resuming negotiations with the west. But after Donald Trump's victory in the US elections, prospects for renewed talks are uncertain.
