

What is Huafu battery?

HUAFU Battery is famous for its quality and long life performance. Focus on deep cycle gel, pure gel battery, R&D on lead carbon battery, high temperature battery, develop in lithium battery. We provide all kind of battery solution for your application.

How Huafu can help you find the best battery solution?

Based more 30 years' experience on energy storage batteries, Huafu will help find the best battery solution for your different applications. Series kind of gel battery with patented technology meet the inquiry for different operation temperature condition with super performance, and provide the cost-effective solution.

How much power does Huafu produce a year?

Today, Huafu has nearly 200 full-time R&D personnel, nearly 100 part-time R&D personnel, With International advanced automatic equipment and excellent producing process, Huafu produces an annual capacity of approximately 4,000,000kVAh. Lead battery : Classify our lead battery into Energy Storage Battery Series, Back-Up Battery, EV Battery.

Who is Huafu?

HUAFU - Engaged in being the leader of storage battery industry. HUAFU - Engaged in being the leader in scientific and technological innovation in the energy storage industry. More than 30 years experience, NO. 1 in sales of GEL battery in Chinses market, Participant of setting of lead carbon battery industry standard.

What is the Baghdad Battery?

The Baghdad Battery is the name given to a set of three artifacts which were found together: a ceramic pot, a tube of copper, and a rod of iron.

When was the Baghdad Battery discovered?

Discovered in the ruins of Khujut Rabu, near Baghdad, Iraq, in the 1930s, the Baghdad Battery has puzzled researchers ever since. Dating back to the Parthian period, around 250 BCE to 224 CE, this enigmatic artifact raises intriguing questions about the technological capabilities of ancient civilizations.

The subject of the Baghdad Battery is an interesting one, especially to a modern electroplater. Unfortunately the vessels that König describes, and the items found with them, are kept at the museum in Baghdad, Iraq. Because of the current political situation, it would be difficult for a curious American AESF member to

The Baghdad Battery is just one such example. In 1938, the German archaeologist Wilhelm Konig found a strange-looking ancient clay jar and others like it as part of a collection in the National Museum of Iraq attributed to the Parthian Empire. This ancient Asian culture ruled most of the Middle East from 247 BC to AD 228.
