

Is it easy to be a female worker in a solar bracket factory

How many women are employed in solar PV?

In 2021, the solar PV industry employs 4.3 million people--one-third of all renewable energy jobs worldwide. Women account for 40% of this number. It is almost double the share of women employed in the wind industry (21%) and the oil and gas sector (22%).

Do women make a lot of money in solar?

Women make up just 27% of the solar workforce, but they have a considerable opportunity to make careers in the solar energy industry and earn highly skilled, well-paying jobs. In the US, women still make 78 cents to every man's dollar.

What role do women play in the solar PV industry?

Additionally, there is a wide space for women to take over more decision-making positions, as they currently hold 30% of managerial jobs and barely 13% of senior management posts in the solar PV industry.

What jobs do women have in solar PV?

Driven in part by off-grid solar PV deployments, women account for 35% of other non-technical positions such as marketing, sales, distribution, and product assembly and installation.

Is the solar energy sector male dominated?

The solar energy sector has traditionally been male-dominated, presenting unique challenges for women. In my early days, I was often the only woman in meetings or on-site visits, making it harder to prove my value. However, as more women join the sector, it has become a more comfortable and supportive environment for development and growth.

How can a mentor help a woman in solar?

Experienced mentors can offer guidance, support, and inspiration, helping women develop their skills and confidence. This mentorship can create a cycle where successful women motivate and inspire others to enter the field. Being a woman in solar is about more than creating your own career; it's about contributing to a sustainable future.
