

Can solar panels cause a leaking roof?

Solar panels should not cause a leaking roof when installed correctly. However, incorrect installation or shoddy workmanship can lead to leaks. In both cases, the leak can usually be fixed, but it might be more extensive than resolving a wiring issue.

Is it the solar panels that are leaking?

If solar panels are not ideally suited for your roof, poor installation tactics can make your roof leak. Roofs made from wood shingles, clay, slate, and terracotta tiles are particularly vulnerable to leaks and damage during installation.

Can solar panels damage a roof?

Fortunately, roof damage from a solar panel installation is extremely rare because installers take precautionary steps while installing panels to prevent leaks and other damage. Like any home improvement project, using the right service provider is essential to a rooftop solar job.

What should I do if my solar panel is leaking?

Regularly clean the panels and surrounding roof areas to prevent buildup of dust, leaves, and other debris that can cause damage. Inspect and reinforce roof flashings and seals to prevent leaks and water damage, especially in areas surrounding the solar panel mounts.

Can solar panels be installed on a shingle roof?

Solar panels can be installed on shingle roofs, but some shingle materials may not be as compatible and may require additional consideration during installation. If the roof is not ideal for solar panels, poor installation tactics are more likely to make it leak.

Do solar panels need a roof inspection?

Inspect and reinforce roof flashings and seals to prevent leaks and water damage, especially in areas surrounding the solar panel mounts. Consider a professional roof inspection every few years to assess the impact of the solar panels on the roof's integrity and make necessary adjustments.
