

The Offshore Renewable Energy Strategy highlights the need to reach at least 300 GW of offshore wind and 40 GW of ocean energy by 2050 in the EU as a key means to reach climate neutrality, providing a major opportunity to ramp up ...

The Government has launched a public call to develop Malta's first offshore renewable energy project, located 12 nautical miles off the Maltese coast within the country's Exclusive Economic Zone.

Malta will be issuing an international call for offshore wind turbines and solar panels next week, prime minister Robert Abela said on Friday. He announced this during a discussion with a number of young people addressing various subjects, including renewable energy, the environment, and women in politics.

2 ???&#0183; We announced the opening phase of the procurement process that will lead Malta to having, for the first time, wind energy supplied to its grid. This project, aimed to increase the ...

2 ???&#0183; We announced the opening phase of the procurement process that will lead Malta to having, for the first time, wind energy supplied to its grid. This project, aimed to increase the indigenous renewable energy portion in Malta's energy mix, fits perfectly with our vision for the sector and will contribute to the government's aim of achieving ...

Interconnect Malta has officially launched the Preliminary Qualification Questionnaire (PQQ) for the nation's first offshore floating wind farm. This project marks a significant milestone in Malta's journey towards carbon neutrality by 2050, as outlined in its Low Carbon Development Strategy (LCDS).

Malta's Ministry for the Environment, Energy and Enterprise has issued a draft National Policy for the Deployment of Offshore Renewable Energy for public consultation and has demarcated six floating offshore wind development areas located beyond the country's 12-nautical-mile territorial waters and into its potential Exclusive Economic Zone (EEZ).

"This policy paves the way for Malta to tap into the vast potential of offshore renewable energy, particularly floating wind and solar projects. By 2030, we aim to increase our share of renewables in the energy mix to 25%, and offshore energy will be instrumental in achieving this goal," minister Miriam Dalli said then.

The Maltese islands could become fully reliant on renewable energy sources (RES) for periods of time once the government's planned energy projects are completed, according to a government energy ...

The Offshore Renewable Energy Strategy highlights the need to reach at least 300 GW of offshore wind and 40 GW of ocean energy by 2050 in the EU as a key means to reach climate neutrality, providing a major

opportunity to ramp up renewables, develop a resilient industrial base in the whole EU and creating quality jobs, benefiting both coastal ...

The 2025 Budget reaffirms the government's commitment to developing offshore wind farms in Malta's Exclusive Economic Zone, which extends up to 370km from its coastline, and solar energy projects in its ...

The 2025 Budget reaffirms the government's commitment to developing offshore wind farms in Malta's Exclusive Economic Zone, which extends up to 370km from its coastline, and solar energy projects in its territorial waters, ...
