

How many MW is a solar power plant in the Ivory Coast?

The authorities in the Ivory Coast have completed a 37.5 MW solar plant, with a second development phase now underway to increase its capacity to 80 MW. The first phase of a solar power plant in the northern part of the Ivory Coast has been inaugurated.

Will IPPs build solar power plants in Ivory Coast?

The selected IPPs will build solar power plants capable of delivering 60 MWp to the national grid in Ivory Coast. The solar plants are being built under the "Scaling Solar" program, an IFC initiative to leverage public-private partnerships (PPPs) for the rapid construction of solar power plants in developing countries, particularly in Africa.

When will Ivory Coast's solar power plants be built?

The minister said that contracts are currently under review for the construction of other solar power plants, with a cumulative capacity of 600 MW. Commissioning of these projects will take place in 2025 and 2026. Coulibaly said the Ivory Coast's installed solar capacity currently stands at 2,907 MW.

Which companies are developing solar power plants in Ivory Coast?

The Egyptian company Elsewedy Electric is also among the potential developers of the Laboa and Touba solar plants. The same goes for Infinity Power Holding and Nareva Holding, the subsidiary of the Moroccan group Al Mada. The selected IPPs will build solar power plants capable of delivering 60 MWp to the national grid in Ivory Coast.

How much does the Ivory Coast electricity project cost?

The project, which has a total cost of EUR75.6 million (\$81.8 million), is expected to power 70,000 homes, saving 60,000 tons of CO2 equivalent per year. It is creating more than 300 direct and indirect jobs during construction. The project is part of efforts to diversify electricity production in the Ivory Coast.

How much energy does the Ivory Coast have?

It currently has a capacity of 37.5 MW, but Coulibaly says this is set to expand to 80 MW, with financing for the expansion already approved by the Council of Ministers. The Ivory Coast has vowed to reduce its greenhouse gas emissions by 32% and increase the share of renewable energy in its energy mix to more than 40% by 2030.

The Ivory Coast is set to begin construction of the \$63.5 million Ferke Solar power plant in Sokoro, which will have an installed capacity of 52 MW. Announced by government spokesperson Amadou Coulibaly in April, the project will commence in the second quarter of 2024 and is expected to be operational by the third quarter of 2025.

The Ivory Coast is set to begin construction of the \$63.5 million Ferke Solar power plant in Sokoro, which will have an installed capacity of 52 MW. Announced by government spokesperson Amadou Coulibaly in April, the ...
