

Fortune CP provides innovative renewable energy products and services in Ivory Coast. These include solar components (solar panels, inverters, batteries), off-grid and grid-tie solar systems for commercial, industrial and residential applications, battery energy storage systems, energy efficient LED lighting systems, solar water heating ...

The selected IPPs will build solar photovoltaic power plants capable of delivering 60 MW to the Ivory Coast's national grid. These projects are in line with Ivory Coast's target to generate 42% of its electricity from renewable energy by 2030.

Ivory Coast inaugurates its first solar power plant in Boundiali, marking a shift towards renewable energy. The project aims to reduce reliance on fossil fuels and double its capacity to 80 MWp by 2024. It employs 350 locals and serves as a model for sustainable development in the region.

The Ivory Coast is set to begin construction of the \$63.5 million Ferke Solar power plant in Sokoro, which will have an installed capacity of 52 MW. Announced by government spokesperson Amadou Coulibaly in April, the project will commence in the second quarter of 2024 and is expected to be operational by the third quarter of 2025.

The northern Ivorian town has some 68,000 solar panels bought from China laid out in rows across 36 hectares (89 acres). The panels convert sunlight, not heat, into electricity. By the end of next year, the aim is to have twice as many panels to reach a production capacity of 80 MWp (Megawatt peak, a measure of the maximum potential output). 3/8
