

Does Ivory Coast use natural gas?

The AZITO power station, built in 1999 and supplying one-third of the country's energy, uses natural gas produced off the coast of Ivory Coast. In 23 years, the project's capacity has grown nearly fivefold. After investing in new steam turbines in 2013, Ivory Coast became the first African country to use the combined-cycle system.

Is Ivory Coast a greener country?

After investing in new steam turbines in 2013, Ivory Coast became the first African country to use the combined-cycle system. This greener technique creates more power at a lower cost by recycling exhaust emissions. As new discoveries are made offshore, opportunities for expanding gas-to-power are promising. Transitioning to Green Energy

How can Ivorian government make West Africa a regional electricity hub?

With the third-largest electricity system in West Africa, the Ivorian government is working towards making the country a regional electricity hub, and through the utilization of public-private partnerships (PPP) as well as the maximization of gas and renewable energy, the country is well on its way to achieving this goal.

The Ivory Coast government is speeding up the construction of the first metro line in Abidjan. The railway infrastructure, financed by loans from several French banks, should relieve congestion in the Ivorian economic capital in two years.
