

Axeon brought its applications engineering expertise in battery systems to Johnson Matthey, strongly complementing Johnson Matthey's existing materials science and research and development expertise.

Johnson Matthey Battery Systems is Europe's leading provider of battery systems for electric vehicle propulsion. We are committed to providing clear knowledge and information on battery technology to all stakeholders in the sectors to promote greater understanding of how batteries can revolutionise the automotive industry.

From this point forward, we cease to be a member of Johnson Matthey, and our company name, formerly known as Johnson Matthey Battery Systems, changes to EMBS. This strategic business decision represents a new era of prosperity and collaboration as we align ourselves with PRETTL Group on battery market.

Johnson Matthey Battery Systems supplies lithium-ion battery technology for cordless power tools, such as cordless hedge trimmers and lawn mowers. Its customers include several major producers of professional power tools, including Robert Bosch GmbH .

Johnson Matthey Battery Systems, part of the Johnson Matthey group and formerly called Axeon, designs and manufactures advanced lithium-ion battery systems for electric vehicles and processes over 70 million cells per year.
