Benin is reliant on electricity imports for a significant share of its energy supply. Reform programmes, including plans for electrification, have been put in place in the country, where only 30% of the population had access to electricity in 2017.

Benin: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

3 ???&#0183; La question de l'&#233;nergie &#233;lectrique est une grande pr&#233;occupation pour tous les gouvernants. Le B&#233;nin, &#224; l'instar des autres pays, fait face &#224; l'&#233;quation d'une &#233;nergie de ...

While Benin has a large hydroelectricity potential only one major hydroelectric site currently functions. Development of over 80 pre-identified sites using micro-hydro applications would help Benin increase its energy resilience.

énergies de qualité pour son développement économique. Ainsi, des actions ont été menées afin de réduire tant soit peu le déficit en énergie pour les populations béninoises afin de dynamiser

Benin is a coastal country located in the Gulf of Guinea in Western Africa, which is a resource rich region. Energy in Benin has a diverse energy mix and takes several forms including: solar, wind, hydropower, biomass, fossil resources, and mineral resources. Out of this energy mix, about 60% of energy comes from biomass. Benin is also dependent on energy imports from Ghana and Côte d'Ivoire. While power plants and other energy facilities were built in the 1950s and 1960s, the la...
