

Ms. Katrina Lugodhi Elifas (hereinafter referred to as "Ms. K.L Elifas") intends on obtaining an Environmental Clearance Certificate (ECC), to construct and operate a 40 Megawatt (MW) solar photovoltaic (pv) power plant, to produce electricity for the consumption of the immediate and

Given Namibia's immense solar potential, how can solar PV be better integrated with national and regional transmission grids? There is a need for industry participants from different sectors - that is the energy sector, ...

HOPSOL Africa is a technology leader for on- and off-grid solar power plants, fuel save controllers as well as solar diesel hybrid systems at utility scale (e.g. mining solutions). We are specialized in building and operating solar power plants in deserts and desert-like regions.

Namibia leverages solar potential to fuel its energy transition, aiming for sustainability and reduced import dependency amidst growing regional demand and technological advancements in renewable resources.

Given Namibia's immense solar potential, how can solar PV be better integrated with national and regional transmission grids? There is a need for industry participants from different sectors - that is the energy sector, government institutions and ...

Another company that benefited from the electricity scheme is Unisun Energy, which won the deal to build the 5MW solar plant at Okatope in Oshikoto region. Unisun Energy is owned by Katrina Elifas David, the daughter of King ...

Another company that benefited from the electricity scheme is Unisun Energy, which won the deal to build the 5MW solar plant at Okatope in Oshikoto region. Unisun Energy is owned by Katrina Elifas David, the daughter of King Immanuel Kauluma Elifas, who ruled the Ondonga kingdom for 44 years. David has a 15% stake, while Treferina Iyambo owns 15%.

InnoSun - one of the first movers in the market - is aiming to surpass the country's goal of achieving a 70% renewable energy mix by 2030 through the establishment of utility-scale solar PV and wind power plants.

We are a team of passionate people that firmly believe that the future of electricity is driven by a combination of renewable sources like solar energy. We want to help people achieve this by providing a solution that can actually save them money. We have over 5 years of solar experience across Lebanon.

HOPSOL Africa is a technology leader for on- and off-grid solar power plants, fuel save controllers as well as solar diesel hybrid systems at utility scale (e.g. mining solutions). We are specialized in building and ...
