

What is the Liddell battery energy storage system (BESS) project?

The Liddell Battery Energy Storage System (BESS) Project is being built at AGL Energy's (AGL) Hunter Energy Hub in New South Wales (NSW). The project infrastructure will include approximately 900 pre-assembled battery enclosures. (Credit: Z22/Wikipedia)

Who will deliver the Liddell battery project?

The Liddell Battery Project will be delivered under an Engineer Procure Construct (EPC) Contract by Fluence Energy. AGL has appointed Fluence Energy to act as the Principal Contractor and have HSE control for the Liddell Battery Project site.

What is the final investment decision on the Liddell battery project?

The Final investment Decision (FID) on the approximately A\$750m Liddell Battery project was announced in December 2023. (Credit: Fluence) The Liddell Battery Energy Storage System (BESS) Project involves the development of a 500MW, two-hour duration grid-scale battery in New South Wales (NSW), Australia.

How will Liddell's battery storage benefit New South Wales?

As Liddell has retired, this battery will help meet peak demand and help to back up wind and solar generation. Due to Liddell's location, the battery storage will help ensure the ongoing stability of New South Wales power system. This will make use of the significant infrastructure at Liddell and utilise it for battery storage.

Will Liddell battery be connected to TransGrid 330kV substation?

Liddell Battery will be connected to the existing TransGrid 330kV substation through a new 330kV high-voltage power line. Planning approval for the Liddell battery project was issued by the NSW Department of Planning and Environment (DPE) in March 2022.

When did the Liddell battery project get planning approval?

Planning approval for the Liddell battery project was issued by the NSW Department of Planning and Environment (DPE) in March 2022. In December 2022, the BESS was selected as one of eight battery projects by the Australian Renewable Energy Agency (ARENA) for conditional funding. It received an A\$35m grant from ARENA.

The grid-scale BESS would be located at the site of Loy Yang power station, a 2,225MW coal power plant which is fed directly from an adjacent coal mine.. AGL will now assess the economics and viability of the project. The company is undertaking a demerger to separate its generation and retail businesses into two entities: Accel Energy, which will carry on the ...

The BESS is located to the south of the existing Liddell Power Station. The OHL extends from the BESS to the existing grid connection at the Liddell Switchyard (west of the Liddell Power Station). Fluence will entertain any local interest for the Liddell BESS project. More information about this project you may find [here](#)

Project: VBB BESS (retrofit of grid-forming capability) Size (MW/MWh): 300/450 ... Project: Liddell BESS Size (MW/MWh): 500/1,000 Inverter OEM: Power Electronics; Origin Project: Mortlake BESS Size (MW/MWh): 300/650 Inverter OEM: SMA; Related Posts via Categories. WA backs clean energy projects; Partnership to support full decarbonisation for ...

A new company is pitching a 400 megawatt (MW) / 800 megawatt hour (MWh) battery in the Upper Hunter Shire Council town of Aberdeen, just 11 minutes drive north of AGL's massive storage project.

The Origin BESS is also among eight projects totalling 2GW/4.2GWh across Australia which are being supported with funding from the Australian Renewable Energy Agency ... the 500MW/1,000MWh Liddell Battery Project in New South Wales for AGL, another of Australia's major generator-retailer ("Gentailer") utility companies.

Australia's largest energy retailer AGL is forging ahead with its strategy to convert the 1,680 MW Liddell Power Station site into a renewable energy hub, announcing on Friday it has commenced transition planning in preparation for the ageing coal-fired power plant's closure in 2022-2023. ... It is already operating the 30 MW/ 8 MWh BESS at ...

Eligible resources in the most recent round included battery energy storage system (BESS) technology, demand response, gas generators and pumped hydro energy storage (PHES). It followed a first round in which

...

Liddell BESS: AGL Energy: Lithium-ion batter: 500 MW: 1,000 MWh: Orana BESS: Akaysha Energy: Lithium-ion batter: 415 MW: 1,660 MWh: Smithfield BESS: Iberdrola Energy: Lithium-ion batter: 65 MW: 130 MWh: Virtual Power Plant (VPP) Enel X Australia: Demand Response: 95 MW comprising three separate VPPs (50MW, 20 MW, and 25 MW)

It will be at the site of Liddell, a coal-fired power plant which shut down this year and which is owned by AGL. In addition to the LTESA with the NSW government, the Liddell BESS is being supported by an AU\$35 million grant from the national Australian Renewable Energy Agency (ARENA). ... AGL said the BESS would be funded off its balance sheet ...

Ridgey Creek BESS Scoping Report This document has been prepared by Envoca on behalf of Atria Energy Pty Ltd. ... Liddell (1680 MW) has decommissioned one unit and plans to be fully decommissioned by April 2023. Eraring (2880 MW) is planned to close in 2025, Vales Point B (1320 MW) is scheduled to close in 2029 and Bayswater (2640
