

BCG Energy, under Bamboo Capital Vietnam, has entered into a partnership with South Korean renewable energy investor SK ecoplant to establish a solar and wind power project with a 700 MW capacity in Vietnam.

SK ecoplant, the green investment arm of South Korean conglomerate SK Group, has formed a partnership with Nami Solar, an affiliate of Vietnam company Nami Energy, to invest in distributed solar in Vietnam.

BCG Energy, a member of Bamboo Capital Vietnam, has freshly signed a cooperation agreement with SK ecoplant, one of the Republic of Korea's leading investors in renewable energy, to build a solar and wind power plant with a capacity of 700 MW in Vietnam.

The joint venture will help Nami Solar move one major step closer to its vision of becoming a leading distributed solar company in Vietnam. Both the Vietnamese and Korean governments have placed climate change action plans and green ...

SK Ecoplant Co., a South Korean construction engineering and waste management company, said on Friday it has agreed with BCG Energy (BCGE), a wholly owned subsidiary of Vietnam's Bamboo Capital Group, to jointly pursue solar and wind power projects in ...

SK ecoplant announced on Jan. 25 that it will invest a total of US\$200 million over four years in a 250MW rooftop solar power project in partnership with Nami Sola, a rooftop solar power company in Vietnam. Rooftop solar power generation is a distributed power generation method in which solar panels are installed on the roof of buildings.

Under the MoU, Korea Consortium will support Trungnam's power and develop strategic partnerships with Vietnamese firms by bringing high quality equipment, finance, expertise, and technology transfer to Vietnam. Korea Consortium was established in December 2019, consisting of Korea's leading energy companies including Hanwha Energy, KOGAS ...

SK Eco Plant, part of South Korea's SK Group, has joined forces with Vietnam-based Bamboo Capital Group Energy (BCGE) to develop a 700-MW portfolio of onshore wind, rooftop and ground-mounted solar projects in Vietnam.

SK Group, one of South Korea's largest conglomerates, is deepening its collaboration with the Vietnamese government to boost eco-friendly initiatives in renewable energy, carbon capture, and more. With a commitment to achieving net-zero emissions by 2050, SK Group is pioneering Vietnam's fast-growing renewable energy market.

The joint venture will help Nami Solar move one major step closer to its vision of becoming a leading distributed solar company in Vietnam. Both the Vietnamese and Korean governments ...

SK Ecoplant Co., a South Korean construction engineering and waste management company, said on Friday it has agreed with BCG Energy (BCGE), a wholly owned subsidiary of Vietnam's Bamboo Capital Group, to ...

The second-largest conglomerate in South Korea has pioneered Vietnam's fast-growing renewable energy market, operating solar and onshore wind plants in their pledge to net zero emissions by 2050.
