

What happened to Kuwait Energy?

Figures based on GCA reported number as at 31 December 2014 and reflects Kuwait Energy's 100% WI in BEA post 25% WI acquisition from Gharib Oil in June 2015. Kuwait Energy has withdrawn from Block 43, effective 30 June 2015. Source: Wood Mackenzie. Source: IEA, Iraqi Oil Ministry. Snr. Vice President Strategy & Portfolio

Is Kuwait facing a changing energy world?

Kuwait, like all oil-producing countries, is facing a changing energy world today. Shifting supply, demand and technology trends have ushered in an energy world where oil-price volatility and market uncertainty are the defining features.

Will Kuwait increase the share of renewables in energy demand?

Kuwait has a soft target of increasing the share of renewables in total energy demand to about 15% by 2030, up from less than 1% today. The potential for increasing the share of renewables in the electricity generation mix in Kuwait is huge, given its substantial solar and wind resources. Central Statistics Office,

How can we improve energy data collection in Kuwait?

This could be facilitated through more coordination and collaboration between energy players within Kuwait and improving the institutional capacity for data collection. The lack of collaboration and expertise contribute to long delays in receiving feedback and data from energy entities. The situation, however, is expected to improve.

Does Kuwait Energy plc offer to sell or issue securities?

This presentation does not constitute or form part of and should not be construed as, an offer to sell or issue or the solicitation of an offer to buy or acquire securities of Kuwait Energy plc (the "Company") or any of its subsidiaries in any jurisdiction or an inducement to enter into investment activity.

Does Kuwait need solar power in 2035?

Despite some progress in supporting solar generation, in the Business-as-Usual Case, the share of renewables in total primary energy demand remains low in 2035, only 3%. Electricity generation capacity in Kuwait increases by over 13.2 gigawatts over the Outlook period, reaching 32 GW in 2035, a 70% increase over capacity in 2018.

Kuwait's energy industry stands at a critical juncture, poised for both significant challenges and transformative opportunities. Shifting dynamics in the energy landscape, coupled with growing concerns over climate change ...

Kuwait's crude oil production capacity, including the Neutral Zone, declined after 2017 from nearly 3.2

million b/d to below 2.8 million b/d in 2020 because of insufficient investment, cost ...

This initiative marks Kuwait's first roadmap for energy transition, which is projected to generate net economic gains of \$390 billion by 2060. The roadmap targets major energy consumers, including electricity, transportation, and the oil sector, which together account for 70% of Kuwait's energy usage.

to present this first annual issue of the Kuwait Energy Outlook (KEO), which will serve as the essential foundation for addressing developments in Kuwait's energy sector in decades to come. We examine the energy sector in Kuwait today, from the upstream supply sector, to mid-stream conversion systems, to downstream demand.
