

What is the energy supply of Kyrgyzstan?

Kyrgyzstan had a total primary energy supply (TPES) of 168 PJ in 2019,of which 37% from oil,30% from hydropower and 26% from coal. [1]The total electricity generation was 13.9 TWh (50 PJ),of which 92% came from hydroelectricity,the only significant renewable source in the country. [1]

How has Kyrgyzstan reformed its energy sector?

Since the 2015 review,a number of energy sector reforms have taken place in Kyrgyzstan,and the country has made noticeable steps forward in developing non hydro sources of renewable energy,while setting clear targets to increase the share of variable renewable energy in the energy mix.

Does Kyrgyzstan have a sectoral energy demand?

IEA. All rights reserved. At 9% of TFC, Kyrgyzstan's industrial sector represents the smallest share of the country's sectoral energy demand in comparison with buildings and transport. The annual energy efficiency potential of Kyrgyzstan's industry sector is estimated at just over 11% of annual energy consumption.

Which sector consumes the most energy in Kyrgyzstan?

Residential sector is the largest energy consuming sector in the country,followed by transport and industry. Electricity consumption per capita,although sometimes limited by power outages,increased by more than 45% from 2010 to 2018. Renewables contribute to 27% (2018) of Kyrgyzstan's energy mix.

Who regulates the energy sector in Kyrgyzstan?

Energy tariff setting and other wider energy sector regulatory matters fall under the responsibility of the Department for Regulation of the Fuel and Energy Complex under the Ministry of Energy. The buildings sector in Kyrgyzstan holds significant energy efficiency potential.

Does Kyrgyzstan have a plan for energy R&D?

Replication of such projects is minimal or absent. Nevertheless,Kyrgyzstan has significant potential to increase its R&D activities,including in the energy field,with the support of long-term planning. Overall spending on R&D is low,and the country does not yet have a specific strategy or action plan for energy R&D.
