

Central battery system ZB96 complies with EN 50171 and BGV A3 to supply power to 230V/216V AC/DC safety and exit luminaires. Suited for Emergency escape lighting systems complies with DIN VDE 0100-718, DIN EN 50172 and E DIN VDE 0108-100.

successful ZB 96 Central Battery System. For many years now the ZB 96 system has enjoyed an enviable reputation as a dependable supply and monitoring system, and features the fully automatic CEWA Guard function monitoring and individual monitoring system. The continuing development of this monitoring system has led to the creation of the ...

The leading solutions for central battery emergency lighting from Eaton's portfolio of technologies are designed to save lives in the most demanding industrial, public and commercial environments. Delivering top performance with the expertise, reliability and ...

System Benefits New charging technology o Increased safety via alternating booster switching o Less energy consumption of 10 % due to optimized efficiency o System for automated battery block monitoring o Maximum 1000 Ah battery capacity o Up to two supplementary module slots for circuit change-over

and battery packs 6 x 12 V / 36 Ah 40071362368 1 LP-STAR 4-48 / ESF30 LP-STAR-4-48 / ESF30, incl. control module, 1 charging unit, 4 circuits, CG-S Bus Interface and battery packs 8 x 12 V / 48 Ah 40071362488 Battery ordering details Type Model Order No. Selection 4 12 V/12 Ah spare part Battery block, period of use: 10 years Connector: Faston ...

Central Battery Systems AC/AC Automatic Test System AT-S+ with STAR+ Technology - Components and options i Bus technology according to RS 485 An RS 485 bus is used for data communication with external bus modules (DLS/3PH). A connection to a central building services management system (BMS) can be made with the CG-S bus.

Eaton's ZB-S is an emergency lighting central battery system that provides reliable power supply (230V AC/220V DC) to safety and exit luminaires. Automatically testing itself, the ZB-S individually monitors each CG-S luminaire (up to 20 per circuit) through the power supply cable alone.

Systems Eaton's mission is to improve the quality of life and the environment through the use of power management technologies and services. We provide sustainable solutions that help our customers effectively manage electrical, hydraulic and mechanical power - more safely, more efficiently and more reliably.

Thus, the CEAG 3-PM-IO and CEAG 3-PM-IO-INV modules are an important part of the safety system. o Permanent function monitoring of the entire system by bus technology o Automatic logging of all test results
