

Sunly Starts Construction Works on Three Large-Scale Solar Photovoltaic (PV) Power Plants in Latvia with a Total Capacity of 225 MW, reported, the Renewable Market Watch(TM) Renewable ...

The largest solar power plant in Latvia - Kalkunes SPP - has commenced production in the Augsdaugava district. The project was developed by Merito Partners and Saules Energy with EUR 10 million investment from Latvian investors and co-financing from Swedbank.

Right now, when there are more and more sunny days and daylight hours, we are starting turnkey construction of new solar power plants in Latvia. We are planning to put the power facilities into operation in the summer, at the peak of solar activity.

KNESS Baltic's new project is a 3.5 MW solar power plant implemented on a general contract basis. The newly built facility is located near the town of Aloja in northern Latvia and is already generating electricity for the grid.

KNESS implemented 3 more solar power plants in Latvia on a turnkey basis. The facilities are already producing clean energy. The total peak capacity of the facilities is 16.4 MW. The sites are located near the towns of Dundaga, Vilaka and Dobeles.

Estonian renewable energy company Sunly is building three solar parks in Latvia with a cumulative capacity of 225 MW. The projects are being developed as hybrid parks, combining solar with...

The largest solar power plant in Latvia - Kalkunes SPP - has commenced production in the Augsdaugava district. The project was developed by Merito Partners and Saules Energy with EUR 10 million investment from ...

With an installed capacity of 13.3 megawatts, it will produce at least 13,500 megawatt hours of renewable energy annually in the future. The new power plant has been developed with a connection to the distribution infrastructure so that residents and businesses consume the electricity generated.

Renewables company European Energy announced October 3 it is ready to start construction of its first solar park in Latvia. The ambitious project, spanning 138 hectares in Targale, Ventspils county, will boast a substantial capacity of 148 MW, making it one of the largest solar parks in the country.

Both plants are now supplying clean energy to the power grid, with Prime Solar holding a 50-megawatt, 20-year power supply agreement with Meralco and delivering the surplus to the ...

Our KNESS Baltic team is currently setting up the construction of two power facilities with a total capacity of 14.3 MW. 420 tons of steel structures manufactured by KNESS have already been manufactured and delivered to ...

KNESS implemented 3 more solar power plants in Latvia on a turnkey basis. The facilities are already producing clean energy. The total peak capacity of the facilities is 16.4 MW. The sites ...

The newly constructed 3-hectare solar power plant is located near the village of Valka and supporting metal structures manufactured by KNESS have been used in the course of the project. Facility's generation will reduce CO2 emissions by 2,597 tons annually.

The total electricity distribution system-connected solar generation capacity was 300 megawatts (MW) at the end of 2023, three times the year before when it was about 100 MW, the State JSC "Distribution Network" (Sadale tikls, ST) reported on February 8.
