

When constructed, this massive solar project has an installed capacity of 115 MW. It is poised to become one of Latvia's largest solar parks, marking a significant milestone in the nation's transition towards a sustainable ...

The solar farm will have a capacity of 148 MW once completed, which will make it one of the largest solar farms in the country. The solar farm will be located near Targale in ...

When constructed, this massive solar project has an installed capacity of 115 MW. It is poised to become one of Latvia's largest solar parks, marking a significant milestone in the nation's transition towards a sustainable future. The solar park is scheduled to be connected to the Latvian grid by 2025.

The most ambitious solar power plant in Latvia to date - Kalkunes SES in the region of Augsdaugava, near Daugavpils - has started production. The new power plant has sufficient production capacity to supply at least 6,500 households in Daugavpils, investors say, Latvian Radio reported on May 3.

Ignitis Group, a Lithuanian utility company, is set to begin construction on a 239 MW solar portfolio in Latvia, the largest of its kind in the Baltic states. The portfolio consists of three separate power generating facilities, including the 94 MW Varme site and the 145 MW Stelpe solar project.

Ignitis Renewables, an international green energy company, is expanding its operations in Latvia. The investment decision foresees an investment up to EUR 106 million in the development of the 174 megawatt ...

It will be European Energy's first project in Latvia and the largest solar park in Latvia. The Targale solar park is expected to be connected to the electricity grid in 2024 and will generate approximately 110,000 MWh of green ...

The Targale solar park is expected to be connected to the electricity grid in 2024 and will generate approximately 110,000 MWh of green energy annually, providing around 52,000 households with their annual ...

Ignitis Renewables, an international green energy company, is expanding its operations in Latvia. The investment decision foresees an investment up to EUR 106 million in the development of the 174 megawatt (MW) Tume solar farm, which will be one of the largest of its kind in the Baltics.

Ignitis Group, a Lithuanian utility company, is set to begin construction on a 239 MW solar portfolio in Latvia, the largest of its kind in the Baltic states. The portfolio consists of ...

Estonian renewable energy company Sunly is building three solar parks in Latvia with a cumulative capacity of 225 MW. The projects are being developed as hybrid parks, combining solar with...

The solar farm will have a capacity of 148 MW once completed, which will make it one of the largest solar farms in the country. The solar farm will be located near Targale in Ventspils County. Upon completion, it will be able to produce around 154,550 MWh annually, providing electricity equivalent to the household consumption of approximately ...

The Targale solar park is expected to be connected to the electricity grid in 2024 and will generate approximately 110,000 MWh of green energy annually, providing around ...

It will be European Energy's first project in Latvia and the largest solar park in Latvia. The Targale solar park is expected to be connected to the electricity grid in 2024 and will generate approximately 110,000 MWh of green energy annually, providing around 52,000 households with their annual electricity consumption.

The Targale solar park is expected to be connected to the electricity grid in 2024 and will generate approximately 110,000 MWh of green energy annually, providing around 52,000 households with their annual electricity consumption.
