

What is a marshield lead lining cabinet?

MarShield manufactures a wide range of Standard or Custom Designed Lead Lined Cabinets suitable for Nuclear Medicine or Radiochemistry laboratories.

Does nuclear Shields manufacture lead-lined storage cabinets?

Nuclear Shields manufactures lead-lined storage cabinets and lead-lined containers for radioactive sources. These cabinets can be used for various applications and can be custom made to your dimensions, amount of drawers and more. Storage of radioactive materials requires the use of radiation shielding.

What are lead-lined cabinets used for?

Our lead-lined cabinets can be used to store radioactive materials used in nuclear medicine, non-destructive testing, nuclear energy and many other sectors. Gamma radiography is a non-destructive testing method to test the quality of various components. Gamma rays and x-rays are used to analyse the manufactured components.

What size lead line cabinets are available?

**LEAD LINED CABINETS** All standard cabinets are available with your choice in lead shielding - 1/4", 1/2" and 1" (custom thickness available up to 4"). Our cabinets combine effective radiation protection and durability in a rugged, attractive

Why should you choose a lead shielding cabinet?

Our cabinets come with customizable lead shielding options to meet stringent safety standards. Designed for functionality, they feature key-locking security, label slots for easy identification, and are built to withstand up to 1,500 lb, ensuring a secure, compliant solution for all your radiological needs.

What is a modular shielded cabinet solution?

Our modular shielded cabinet solution ranges from lead-lined radioisotope storage cabinets, shielded synthesis module enclosures to shielded biological safety cabinets. All our lead shielding products are manufactured in our lead casting, assembly, spray painting and quality control departments.
