The Battery Box is the first Lithium battery fire containment box solution which is engineered to fight all thermal runaway problems. It is completely insulated with highly advanced insulation materials which can withstand a continues temperature of 1200 °C, peak temperatures of 1400 °C in minimal material thickness.

There are currently three EES facilities operating in Denmark, all of which are electro-chemical (batteries). A fourth EES facility - the HyBalance project - is currently under construction and will convert electricity produced ...

Expanding into battery storage, Better Energy is installing its first 10 MW/12 MWh battery energy storage system design at the Hoby solar park in Denmark. Expected to be operational by the end of 2024, this system will enhance grid stability and support a ...

DTU's innovative research on potassium silicate-based solid-state batteries heralds a potential paradigm shift in EV battery technology, offering a more sustainable and efficient alternative to lithium-ion batteries. This breakthrough could overcome many of the environmental and logistical challenges associated with current battery technologies.
