

How can I connect with a local solar installer?

Local home professionals are often connected with other local experts and have local solar installers to whom they regularly refer their customers. With a network of over 450 installers nationwide, soliciting quotes through the EnergySage Solar Marketplace all but guarantees that you can connect with a local solar installer.

How do I find a solar installer in my area?

Here are some other ways to find and connect with solar installers in your area: Talking to the people around you is a great way to learn about any local company. If your neighbors have solar panels, chances are they have a relationship with a local installation company and can give some insight into their experience.

Should you choose a local solar installer or a full-time installer?

Full-time, local employees are held more directly accountable to the company owners, ensuring motivated, professional employees will install your panels. Furthermore, local installers may be the better choice if you want the highest quality solar technology.

How do I hire a solar power installer?

Once you've determined your needs and are ready to move forward with your solar project, hiring a solar power installer is much like hiring any contractor. Make sure you get multiple estimates based on the same criteria, get referrals, check your installer's certification, and get everything in writing.

How do I get a solar installation?

Fill out the online form, and a trusted independent installer will call you to schedule a consultation. The solar specialist will review suggestions for your home based on square footage, power needs and appliance wattage to ensure a whole house solution. When your assessment is complete, we'll follow up with a quote.

Where should a solar power system be installed?

Regardless of the type of solar panel used, the most ideal setup for a solar power system is installing solar panels on a roof-- in a region with long peak sunlight hours -- with the panels facing south (for homes in the Northern Hemisphere). Investing in a solar power system is easier today than ever before.
