

Location map of Xucun solar power station

How big is China's ground-mounted solar power station?

The tool shows China ground mounted solar facilities occupied a surface of 2,467.7 km² at the end of December 2020. Scientists led by the China Agricultural University have created a national-scale map and dataset of ground-mounted PV power stations in China.

Does China have a spatial map of PV power stations?

Although some researchers released several PV power station maps, most only met a medium resolution of 30 meters. There thus still lacks a national map of China's PV power stations with a higher spatial resolution (i.e., 10 meters) that could provide a global understanding of PV's spatial deployment patterns.

Where are PV power stations located in China?

"In eastern China, PV power stations mainly locate in Anhui, Jiangsu, Shandong, Henan, Hubei and Jiangxi Province, while in southwestern China, Guizhou, Yunnan and Sichuan witnessed the most PV power stations." Concluding the article, the academic group said it will release in the future new maps that are based on data from different years.

Are ground-mounted PV power stations in China based on Sentinel-2 imagery?

Scientists led by the China Agricultural University have created a national-scale map and dataset of ground-mounted PV power stations in China. The data is based on Sentinel-2 imagery from 2020 and has a spatial resolution of 10 meters.

How many ground-mounted PV power stations are there in China?

According to our dataset, China has a total of 2467.7 km² ground-mounted PV power stations in 2020. The top three largest provinces refer to Xinjiang, Inner Mongolia and Qinghai, whose PV area ratio are 14.92%, 12.49% and 11.26%, respectively, with a total of nearly 40% of all the PV power stations of China.

What can a 10-m national-scale distribution dataset tell us about China's PV power stations?

Above all, as the first publicly released 10-m national-scale distribution dataset of China's ground-mounted PV power stations, it can provide data references for relevant researchers in fields such as energy, land, remote sensing and environmental sciences.

Sutiakhali 50 MW Solar Power Plant, also known as HDFC Mymensingh Solar Park or IFDC Solar Park, is a solar Photovoltaic (PV) power plant situated in Sutiakhali under Gauripur Upazila in Mymensingh District of ...

The largest collection of free solar radiation maps. Download maps of GHI, DNI, and PV output power potential for various countries, continents and regions. ... Find the right solar project ...

Location map of Xucun solar power station

Largest Solar Power Plants in India: India is riding the wave of sustainable energy, thanks to lots of suns and a strong desire for green power. The country is serious ...

Largest Solar Power Plants in India: India is riding the wave of sustainable energy, thanks to lots of suns and a strong desire for green power. The country is serious about renewables and lowering carbon emissions. The ...

Quaid-e-Azam Solar Power (Pvt.) Limited is the first ever utility scale solar power plant in the country. It aims to initiate solar energy programs and research projects with respect to Solar Energy power generation plants. We, at Quaid-e ...
