Does community management influence household adoption of rooftop solar photovoltaics in rural China?

This paper examines inequality in household adoption of rooftop solar photovoltaics in rural China through a qualitative study of three villages. The Chinese government promotes distributed solar to drive low-carbon development. However, community management and China's institutional system influence unequal access.

Can a photovoltaic power generation system be built in Ningbo?

In the case of Li'ao Village, a photovoltaic demonstration village in Ningbo City, Zhejiang Province, a photovoltaic power generation system covering the whole roofs of rural houses in the village was built with a collective investment of 5 million yuan.

How many households in Jiangsu have a rooftop PV system?

For example, Village Z in Jiangsu Province has 32 households. In 2017, the local power company planned free rooftop PV installation for 25 households, but only 23 were ultimately installed. Of the 9 non-adopters, 2 lacked suitable roofs, while others declined over roof damage or absentee concerns.

Why is China promoting photovoltaic system in rural areas?

Based on the above reasons, the Chinese government plans to vigorously promote the construction of photovoltaic system in rural areas, which has been included in the 14 th Five-Year Plan of renewable energy development. In the foreseeable future, rural photovoltaic system in China will achieve rapid and sustainable growth. Figure 4.

Are photothermal and photovoltaic systems lagging behind?

However, the development of photothermal and photovoltaic combined with other energy technologies, as well as the integration between photovoltaic technology and buildings are relatively lagging behind. Besides, the life cycle analysis and evaluation of photovoltaic system has not been established.

How can China promote distributed PV?

To promote distributed PV, China's National Energy Administration launched a "county-level promotion" strategy in 2021. This strategy sets a target for at least 20% of rural households in 676 pilot counties and districts to adopt rooftop solar panels. The concept of "energy justice" originates from John Rawls' theory of justice.

History of Longsheng - A secluded farming town. In ancient time, Longsheng was known as "Sang Jiang", a part of Guilin Prefecture. In the year of 1956, it was renamed as Longsheng Various Nationalities Autonomous Region. In the ...
