

What is Lucid Energy?

Portland-based company Lucid Energy is generating power in several US cities using its micro-hydro, in-pipe turbine systems, called LucidPipes. Water has been a source of energy for thousands of years, from the water wheels used by the ancient Greeks to the colossal hydropower dams in South America and China.

Where is Lucid natural gas located?

Lucid provides natural gas gathering, treating, and processing services in the Delaware Basin, including approximately 1,050 miles of natural gas pipelines and approximately 1.4 billion cubic feet per day ("Bcf/d") of cryogenic natural gas processing capacity in service or under construction located primarily in Eddy and Lea counties of New Mexico.

Is Lucid a micro-hydro company?

In 2015, Lucid became the first micro-hydro company to sign a power purchase agreement, and began selling its energy to the grid. This is a big step forward for micro-hydro, which has previously been used predominantly in trials or on a small scale, generating energy to offset water suppliers' large energy demands.

Where can I find information about Lucid Energy?

Please visit for more information. Founded in 2000 by David Leuschen and Pierre Lapeyre, Riverstone Holdings LLC is an asset management firm that invests in the private markets primarily within energy, power and infrastructure.

What happened to Lucid Energy?
