What is a Lumcloon battery storage project?

THe Lumcloon battery storage project, with the Derrycarney 110kV substation next to it. Image: Lumcloon Energy. A 100MW battery storage facilityin Co. Offaly in Ireland has this week been energised, having been developed as part of a partnership between local developer Lumcloon Energy and South Korea's Hanwha Group.

Who is Lumcloon energy?

Lumcloon Energy is a Founding Member of IESA. It represents the interests of the energy storage sector on the island of Ireland.IESA shares knowledge and experience with energy storage players worldwide, so that players here can learn from significant energy storage developments around the globe. This website is using cookies.

What is the energisation of Lumcloon?

The energisation of Lumcloon follows Statkraft completing its 11MW Kerry battery storage projectin Ireland in January 2020,the first completed utility-scale battery storage project in the country. It partnered technology provider Fluence for the project,which used battery modules produced by LG Chem.

Why do we need system services for the Lumcloon project?

System services are required to support the transition to low carbon energy sourcessuch as wind and solar," Lumcloon project development manager Jack Bracken told Energy-Storage.news. Construction of the Lumcloon project began in 2019, with the design and build contractor being Duggan Brothers with Suir Engineering, Malachy Walsh and Partners.

How will the new plants at Lumcloon and Shannonbridge help Offaly?

The new plants at Lumcloon and Shannonbridge will help make Offaly and Ireland a world leader and pioneer in renewable energy". The University of Limerick is the leading research facility in Ireland in the field of electrochemical energy storage.

How much does the Lumcloon-Hanwha project cost?

The plants will have a combined capacity to hold 100 megawatts of electricity, making the the Lumcloon-Hanwha project one of the biggest of its kind in Europe. They are spending EUR100 millionon the development.

A 100MW battery storage facility in Co. Offaly in Ireland has this week been energised, having been developed as part of a partnership between local developer Lumcloon Energy and South Korea''s Hanwha Group.
