

What is agrivoltaics in Luxembourg?

Agrivoltaics is one of the major areas of focus under the plan to promote agricultural production along with solar PV. Photovoltaic installations in Luxembourg are diverse and include rooftop solar, ground-mounted solar plants, floating installations and solar carports.

How can Luxembourg encourage the adoption of solar energy?

To encourage the adoption of solar energy, the Luxembourg government has set up a range of grants and subsidies that make the installation of solar panels even more attractive. The programme Klimabonus offers to reimburse up to 62.5% of the cost of the photovoltaic installation for self-consumption contracts.

Are solar panels a profitable investment in Luxembourg?

Luxembourg is ramping up its financial incentives and making the installation of solar panels a very profitable investment until 2025.

What's next for solar panel and heat pump grants in Luxembourg?

Residents of Luxembourg can currently benefit from 62.5% state support when installing solar panels, a policy in place until 1 July 2024. Since early 2024, the Socom company has been producing solar panels in Hollerich.

Did you know these facts about photovoltaic installations in Luxembourg?

In 2023, there was a significant increase in the number of photovoltaic installations in Luxembourg - 40 MW of new photovoltaic capacity was put into operation in 2022. The total installed capacity in the country reached 317 MW.

How much solar energy does Luxembourg use?

Today, solar energy makes up 13% of Luxembourg's energy consumption. To reach the renewable energy target of 25% by 2030, the Grand Duchy has introduced a string of incentives. The aim is to make efforts to protect the climate a profitable investment. How much is the subsidy?

Photovoltaic installations in Luxembourg are diverse and include rooftop solar, ground-mounted solar plants, floating installations and solar carports. From January 1, 2023, the government ...

There is no extra cost and you are covered for replacement value without any specific limitation in case of fire, and up to EUR 50,000 in case of hail, storm or electrical damage. Ready to save money by producing 100% green energy? Now is the right time to get started!

The solar farm has been installed on three separate buildings of our Dudelange development. The installation can be controlled remotely, providing the Luxembourgian energy company the ...

The investment cost includes the cost of purchasing the photovoltaic panels or hybrid solar collectors, the fixing rails, the electrical wiring directly linked to the installation, the inverter, the electrical protections and the two-way meter as well as the costs specific to these eligible items.

However, have you ever wondered what the average cost of a solar farm is in your country? And worldwide? What costs represent the higher percentage in your accounts and, more importantly, how could we decrease these costs.

This significantly reduces operating costs and lowers CO2 emissions, making them an eco-friendly solution. The section provides technical details, various types of heat pumps, and advice on selecting and installing them, helping you make an informed investment decision.

The solar farm has been installed on three separate buildings of our Dudelange development. The installation can be controlled remotely, providing the Luxembourgian energy company the necessary flexibility for adequate grid management, in order to avoid grid instability.

Photovoltaic installations in Luxembourg are diverse and include rooftop solar, ground-mounted solar plants, floating installations and solar carports. From January 1, 2023, the government reduced the value added tax (VAT) on new photovoltaic installations to 3% and increased subsidies for photovoltaic installations for own needs to 62.5%.
