

Edge Autonomy Energy Systems (formerly known as Adaptive Energy) is a provider of backup and portable power solutions. It delivers battery tenders that integrate with wind, solar, and other alternative technologies as well as the Endurance Series products for use in pipeline monitoring and data collection.

Seamlessly integrated with wind, solar, and other alternative technologies, the Performer Series of power solutions from Edge Autonomy Energy Systems offers a downtime solution to ensure equipment stays functional - even under extreme circumstances.

Edge Autonomy has acquired Adaptive Energy, a designer and manufacturer of Solid Oxide Fuel Cells (SOFCs) for backup, off grid and Unmanned Aerial Vehicle (UAV) power. Adaptive Energy's lightweight, energy ...

Edge Autonomy has acquired Adaptive Energy, a designer and manufacturer of Solid Oxide Fuel Cells (SOFCs) for backup, off grid and Unmanned Aerial Vehicle (UAV) power. Adaptive Energy's lightweight, energy dense SOFCs have been integrated as critical technology in Edge Autonomy's UAV platforms for more than 10 years.

Seamlessly integrated with wind, solar, and other alternative technologies, the Performer Series of power solutions from Edge Autonomy Energy Systems offers a downtime solution to ensure equipment stays functional - even under ...

Top 100 U.S. law firm Akerman LLP represented Edge Autonomy, a leader in unmanned and autonomous technology, in its acquisition of Adaptive Energy, a globally recognized designer and manufacturer of solid oxide fuel ...

Whether a mission calls for integration of a new payload in the field, commercializing patents, or developing a low-watt power solution, our energy components are developed to customize each system based on unique project needs.

The company's innovative solutions are used by US federal agencies and commercial customers in the military, critical infrastructure and transportation end-markets. In addition, Adaptive Energy's lightweight, energy-intensive SOFC has been integrated into Edge Autonomy's UAV platform as a key technology for more than 10 years.
