

Is Madagascar ready for solar power?

With all regions of Madagascar enjoying over 2,800 hours of sunlight per year, the Grande Ile is the perfect location for development of solar power, with a potential capacity of 2,000 kWh/m<sup>2</sup>/year. The Government is counting on this potential to fulfill its objective of providing energy access to 70% of Malagasy households by 2030.

How much energy does Madagascar have?

Around a quarter of the population of Madagascar has access to electricity, and only 1.5% has access to clean cooking facilities. In 2019, Madagascar's energy mix was dominated by biofuels and wastes (85%), with oil products (11%), coal and hydro accounting for the rest of the total energy supply.

Does Madagascar have a business climate?

In the World Bank Group's Doing Business 2018 report that assesses the business climate, Madagascar ranks 184 out of 190 countries for access to electricity. Keenly aware of this challenge, in 2014, the Government of Madagascar decided to embark on intensive reforms to transform the sector.

In 2019, Madagascar's energy mix was dominated by biofuels and wastes (85%), with oil products (11%), coal and hydro accounting for the rest of the total energy supply. In 2020, less than 5% of the population had access to clean cooking ...
